Summary

First-year BSc Computing student transitioning into software development after several years in hospitality. Comfortable with Python fundamentals, Git, and command-line tools. Strong communication and problem-solving skills built through customer-facing roles. Looking for a junior Python developer or internship position.

Education

- BSc (Hons) Computing - in progress, expected 2028
- Coursework: programming fundamentals, data structures, databases, web development

Skills

- Python (functions, OOP basics, working with APIs)
- Git and GitHub (branches, commits, pull requests)
- SQL basics (MySQL)
- HTML and CSS fundamentals
- Command line (Bash, PowerShell)
- Customer service and team communication

Experience

Waiter / Bartender - The Riverside Grill (2022 - present)

- Handled high-pressure service for 80+ covers a night, prioritising tasks under time pressure
- Trained 4 new starters on till systems and service standards
- Resolved customer complaints calmly and professionally

Front of House Team Member - City Cafe (2020 - 2022)

- Managed bookings and daily cash reconciliation
- Worked closely with kitchen and management to keep service running smoothly

Projects

- JobHunt Agent - a Python CLI tool that scores CV/job fit and drafts cover letters using the Claude API, with a test suite and CI pipeline (personal project, 2026)
